What is Tuff-Kote Gold?

Tuff-Kote Gold is a dual-layer paint finish with a base color layer, and a clear protective top layer. The top coat is fused to the base coat during the baking cycle. The result is a paint finish that is more resistant to damage than standard paint finishes.

- Durable satin matte finish.
- More resistant to weather and alkalines.
- Requires less maintenance than other finishes.
- Resists scratching, marring, corrosion and fading.
- Protects against surface damage during installation process.

Use of White Tuff-Kote Gold Dual Layer Paint Finish on the top / outside of any Snap-N-Lock™ Insulated Panel

can make the panel eligible for a Tax Credit. Learn more from a Structall representative or go to www.energystar.gov.

Order custom made panels up to 32' in length.
